TECHNICAL SKILLS

Languages | Python, TypeScript, Java, C/C++, SQL, RISC-V Assembly, Swift, Lisp, Rust

Frameworks | React, Django, Flask, Tailwind CSS, Express.js, Pandas, NumPy, Matplotlib, Redux

Developer Tools | Git, Docker, Visual Studio Code, PyCharm, Unix/Linux, Tableau, Power BI

EDUCATION

BSc Honors in Computer Science, First Class Honours
Minor in Mathematics
University of Alberta **2026**
Edmonton, AB

WORK EXPERIENCE

Teaching Assistant **Sep 2025 – Apr 2026**
University of Alberta Edmonton, AB

- Guided undergraduate students through problem-solving strategies in Calculus, Linear Algebra, Computer Science.
- Delivered one-on-one in-person and online group tutoring sessions to support diverse learning styles and academic needs, teaching over a 100 students per semester.

Community Liaison Summer Student **Jun 2025 – Aug 2025**
St. Paul’s United Saskatoon, SK

- Served as a bridge between St. Paul’s United and the local community, helping connect individuals to programs and support resources.
- Assisted in planning and coordinating community events and outreach programs to increase accessibility and involvement.

Resident Assistant **Sep 2023 – May 2025**
University of Alberta Edmonton, AB

- Acted as a resource hub and referral agent for new residents, providing information and support on campus resources, services and opportunities.
- Supported conflict resolution between residents through effective communication and problem-solving.

Vice President, Technical **Sep 2024 - May 2025**
Winners Campus Fellowship, University of Alberta Edmonton, AB

- Led technical operations for digital and hardware-related projects, achieving improvements in process efficiency.
- Managed and set up hardware and presentation software for 10+ events per semester, ensuring seamless operations
- Pioneered a YouTube live-streaming initiative, increasing event accessibility and engagement.

Head Peer Tutor **Sep 2024 - May 2025**
University of Alberta Edmonton, AB

- Successfully led a team of 10 peer tutors, resulting in a 30% improvement in students’ overall grades.

PROJECTS

PromptEd | Next.js, Supabase, WebSockets, Tailwind CSS, Docker, Github Actions

Apr 2026

- Built an AI-powered RAG pipeline for a live classroom platform serving the Alberta Department of Pharmacology, integrating GPT-4o, OpenAI Whisper, and pgvector embeddings to auto-generate context-aware discussion questions from uploaded PDFs/PPTXs and real-time lecture transcriptions.
- Developed a full-stack web application using Next.js, Supabase (PostgreSQL, Auth, Realtime WebSockets), enabling instructors to manage courses and broadcast live questions while students join anonymously.

LightCoral | Django, FullStack, Git, UML, AGILE development, CI/CD, Heroku

Dec 2025

- Built a distributed web-application that enables federated communication and data sharing across nodes.
- As part of a team of 6, I contributed to designing and implementing the backend API, and cross-node coordination using RESTful web services.
- Improved team efficiency through CI/CD, version control in git/GitHub and coordinated developments.

MuSync | Node.js, Express.js, NestJS, RESTful API, OAuth 2.0, Vercel

Dec 2024

- Built a full-stack application that removes friction for users transitioning between streaming services by enabling cross-platform playlist transfers.
- owned the end-to-end development of the system, including API integration, data normalization, and a background job queue for efficient transfers, reducing latency by over 40% through optimized matching and caching.

Elementary Math App | JS, Responsive UI, Single-page Web App

Feb 2021

- Developed an educational arithmetic practice web app aimed at helping elementary-level students develop mental math fluency.
- Developed a real-time question generation algorithm, and progress-tracking logic.
- Improved user engagement by ~30% after adjusting difficulty & simplifying the interface based on user feedback.
